

Reasons to Participate

When disposed of improperly, household hazardous wastes can threaten the quality of our drinking water, increase the threat of algae bloom and threaten the safety of sanitation workers (if discarded in the trash, these items may ignite or explode in the collection truck).

Household hazardous waste left around the house and garage pose an accidental poison risk to children and pets.

Since the items brought to a Clean Sweep are properly disposed of by Outagamie County's Solid Waste Department, you can feel good that you have kept these items from entering the landfill or contaminating our water supply.

Directions to
Outagamie County
Department of Solid Waste

1419 Holland Road,
Appleton

Holland Road is located one mile east of Hwy 441 off Northland Avenue (County Road OO)

Turn north onto Holland Road; travel 1/2 mile and turn left into gate #3, directly across from Elm Drive.

Follow the entrance road using the left lane; **check in with the attendant to receive further direction.**

Explosives
Radioactive (smoke detectors)
Propane Tanks *
Infectious/Medical Wastes
Asbestos *
Appliances *
Tires *
Latex Paint (dried) *

*These items may be dropped off at the Solid Waste site. Charges will be applied.

WHAT TO DO WITH LATEX PAINT

Latex paint is not a hazardous material. It can be disposed of with your regular trash when the paint is dry. If the paint is still liquid, open the top and allow the paint to air dry. To speed up the drying process, you may add sand, kitty litter or paint hardener to the paint.
